HealthyConnect planning illustration: averages 1.5 qualifying tracks across enrolled patients; each track requires distinct qualifying review and coordination. Uses national-base payments of $30 × 3 reviews plus $10 qualifying onboarding per track. CMS minimum review and coordination time: 5 minutes; this model uses 7.5 minutes. Onboarding, billing and other administrative time are additional to the review-hour denominator. Actual payments vary by practitioner type, geography and applicable adjustments. This is gross revenue, not profit or a guaranteed result.
